

ITENOS stands for more than 25 years of ICT experience. We put our faith exclusively in state-of-the-art technologies, so we always deliver the best solution.

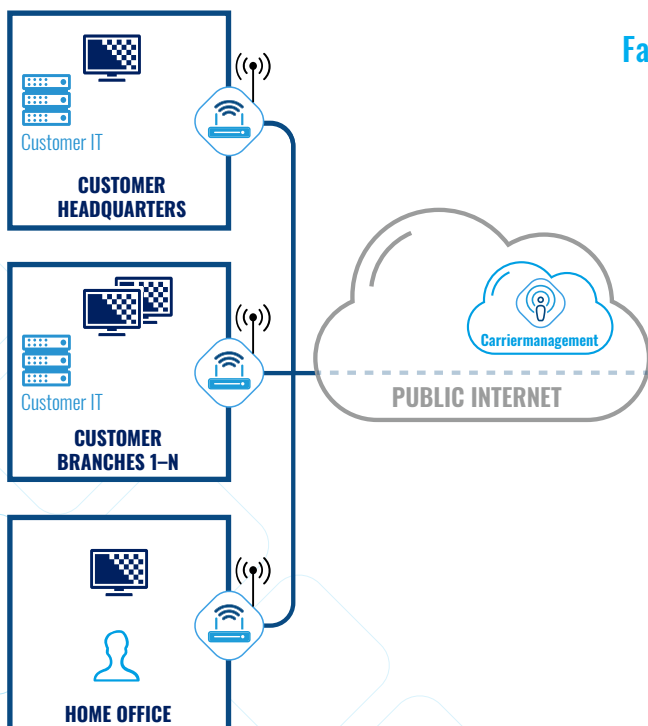

Business Internet Service: Your secure IP VPN location networking

High-performance location networking is essential for the efficiency and competitiveness of every enterprise. More and more business processes are running online: data is centralized in the cloud, and the demand for bandwidth is skyrocketing. At the same time, requirements for flexibility, functionality and service are constantly growing, accompanied by rising cost pressure. This makes secure and stable IP VPN networking indispensable. **Business Internet Service (BIS) is the solution for comprehensive, secure communication between sites as well as remote and home office access.**

Fast, secure and professional data transfer

We take care of secure IP VPN networking, so that you have more time for your core business. ITENOS Business Internet Service gives you fast and stable internet connections with managed routers for professional data transfer. From router procurement and configuration to central administration and essential incident management, we offer everything from a single source – tailor-made and professional with high-performance.

To meet all of your specific needs, you can combine your Business Internet with MPLS solution concepts. In addition, BIS is ideal as a basis for SD-WAN overlay solutions. Thanks to ITENOS carrier management and the latest wireless mobile device connections, BIS is available anywhere and anytime.

Our strengths with BIS

Fast and secure networking

IP VPN networking of corporate branches and home office connections with various technologies, including xDSL, FTTH, LTE and 5G

Router management according to customer demand

Tailor-made service from a single source: from router procurement and configuration to central administration, including incident management

MPLS integration

Compatible with existing or new MPLS solution concepts such as ITENOS ProtectService

ITENOS SD-WAN integration

Compatible with modern SD-WAN as an overlay

ITENOS carrier management

Access to advanced carrier and access technologies

Tailor-made ITENOS WLAN solutions

Secure, flexible and future-proof

Your ITENOS benefits

We are the first choice for SMEs when it comes to custom ICT solutions from a single source:

- Customized and tailor-made network concepts
- Agile implementation of customer requirements
- Stringent security standards
- An ITENOS customer team for all services and processes, with 360° support
- Own service desk in Germany
