

Supporting SMEs: ITENOS receives colocation provider award for the fifth time

– ISG-REPORT –

“ITENOS is an agile colocation service partner with a comprehensive portfolio for startups and SMEs that leaves

nothing to be desired.”

ISG, 2023

For the “Next-Gen Private/Hybrid Cloud – Data Center Services 2023” category of the Provider Lens™ award, ISG evaluated 20 colocation service providers for medium-sized business customers in the mid-market segment. As in previous years, ITENOS once again received the highest rating in the Leader quadrant from the research firm, confirming the outstanding quality of its services as a leading colocation provider.

As an established and hugely successful colocation provider with a total of seven data centers and a total net area of 31,200m², ITENOS “serves more than 200 customers, focusing on startups, SMEs, and the mid-market segment as well as service and cloud providers.” According to ISG experts, ITENOS is an agile partner whose comprehensive portfolio “leaves nothing to be desired.” The research firm also pointed out the excellent connectivity provided by the innovative DataLogistIX platform and was impressed by the sustainability of ITENOS.

What makes us stand out in the Colocation Services category according to ISG

Comprehensive colocation portfolio

"In highly secure, multiple certified data centers, ITENOS offers a range of high-quality colocation services, tailored perfectly to the needs of individual customers. The company's portfolio boasts many different services, including 24/7 remote hands services. Depending on a customer's IT infrastructure, they can choose various racks, cages, or suites. ITENOS also makes any additionally required hardware available at a fair price."

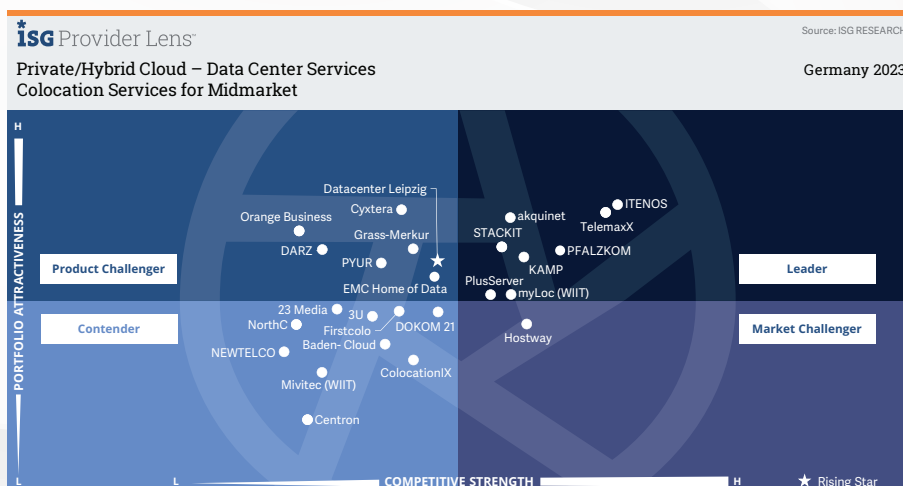

Innovative connectivity platform

"The DataLogistIX platform developed by ITENOS is a modern and virtual solution that provides access for all users via a single physical port and flexible and efficient connections to other partners and internet exchanges as well as secure direct connections to all public cloud providers. ITENOS is able to access more than 150 Internet Service Providers (ISPs)."

Sustainability

"ITENOS data centers have been powered by 100% renewable energy since 2016. All emissions are recorded for analysis and to develop suitable measures to reduce and/or offset them. ITENOS supports the UN's Sustainable Development Goals (SDGs), helping to promote sustainable economic, social, and ecological development around the world."

"We are delighted to have received this award from ISG for the fifth time in a row. Our leading position among colocation providers illustrates that we are not only succeeding in our mission to support SMEs, but also that we understand the needs of our customers—and are meeting them perfectly. Our excellent ranking motivates us to continue providing customized solutions for maximum customer satisfaction."
