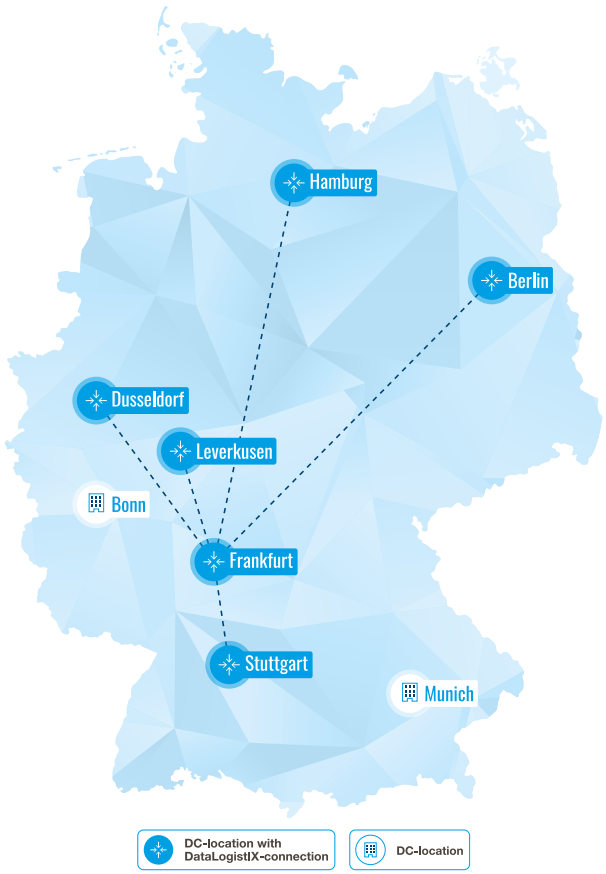
DATA CENTER LEVERKUSEN 1



Level-3 data center in North Rhine-Westphalia

Our Leverkusen data center is located in the heart of the Rhine-Ruhr metropolitan region. With a total area of 2,000 square meters, we offer our customers state-of-the-art IT infrastructure. The Leverkusen site is connected to the world's largest Internet exchange point, DE-CIX in Frankfurt/ Main and IPv6 ready. Our customers thus benefit from a high level of connectivity and flexibility. High-performance Internet and cloud connections as well as Ethernet connectivity via our DataLogistIX platform complete our range of services.

High fail-safety thanks to Tier 3 standard

The data center was built in compliance with the Tier 3 standard. Multi-level security systems and a 24/7 control center ensure the greatest possible protection. In addition, we take various precautions to protect our customers' hardware from damage caused by fluctuations in the power grid and thus ensure a reliable operation. A high level of IT security and fail-safety is therefore another important argument in favor of our data center location in North Rhine-Westphalia.

WHAT DISTINGUISHES THE LEVERKUSEN 1 DATA CENTER?

Location
- Leverkusen, Rhine-Ruhr metropolitan region
- DIN EN 50600 VK3, ISO 27001 and ISO 9001 certified
- 2.000 m² total area
- Colocation areas for individual racks
- Dedicated rooms and fire protection areas

Connectivity
- Connection to DE-CIX Internet exchange point
- More than 900 carriers available worldwide
- Cisco vendor based platform
- IPv6 ready
- DataLogistIX platform for IP-access, IP-transit, Cloud Connects, Ethernet and Wavelength solution

Security
- Building monitoring via 24/7 control center
- 24/7 access with biometric access control
- RC4-certified building shell

Cooling
- Indirect, open, adiabatic cooling
- Cold air distribution via raised floor
- Server air supply via ventilation plates
- Energy efficient racks with 2 to 10 kW

Power
- Separate 2n power supply
- Energy-efficient n+1 UPS systems that can be expanded during operation
- Earthing and equipotential bonding connections
- TNS network and differential current monitoring

Services
- Installation, disassembly and disposal of customer racks
- Hardware installation and removal
- Installation and deinstallation of power supply
- Performance-level measurements

With more than 30 years of experience in the IT industry, ITENOS is your reliable partner. To ensure the greatest possible customer satisfaction our high-quality solutions and services are of course ISO certified – and we as a company also hold other awards.
