

DATA CENTER MUNICH

Maximum security in the south of Germany

Our [data center in Unterschleißheim near Munich](#) expands our footprint in the south of Germany. This Tier 3 data center boasts 9,700 kW of power across an area of 6,300 m². Not only is it highly available and secure, but also easily accessible in an economically important metropolitan area. The location also stands out thanks to an office area and ample parking for customers.

Excellent connectivity and maximum security

This state-of-the-art data center is connected to the [DataLogistIX platform](#) for optimal networking. This enables high-performance Internet connections, [Cloud Connects](#), and [Ethernet Connect](#) via one port, ensuring excellent connectivity. Thanks to access control and continuous CCTV monitoring with a security archive, this carrier-neutral data center is secure and accessible 24/7. A redundant power supply with independent A and B feeds to each server rack and on-site emergency power generation from renewable energy sources ensure high availability. Early smoke detection and fire extinguishing systems also provide security for IT infrastructure in all the center's technical and critical areas.

WHAT DISTINGUISHES THE MUNICH DATA CENTER?

Location

- Unterschleißheim near Munich
- Located just off the A92, 15 minutes by car from Munich International Airport
- 6,300 m² total area
- 9,700 kW power
- Tier 3 data center
